

Customized Training Overview

Automation Studio Motion Training 1

Name	AS_M_TR1
-------------	----------

Goal	<ul style="list-style-type: none">▪ The components of a mechatronic drive solution▪ Configuring the B&R drive solution▪ The testing environment for commissioning a drive▪ Using the diagnostics tools▪ Motion Control Basic Functions - PLCopen▪ Structured programming of movement sequences▪ Simulation options▪ Using the sample applications
-------------	--

Content	B&R Drive Products TM400 - The Basics of Motion Control TM410 - The Basics of ASiM TM440 - ASiM Basic Functions
----------------	--

Prerequisites	Automation Studio Training: Basics
----------------------	------------------------------------

Duration	3 days
-----------------	--------

Automation Studio Motion Training 2

Name	AS_M_TR2
-------------	----------

Goal	<ul style="list-style-type: none">▪ Simple axis links▪ Gear couplings and phase shift▪ Compensation mechanisms▪ Cam profile and Cam Profile Automat▪ ACOPOS control concept, controller settings▪ Starting up motors
-------------	---

Content	TM441 - ASiM Multi-Axis Functions TM450 – ACOPOS Control Concept and Adjustment TM460 - Starting Up Motors
----------------	--

Prerequisites	Automation Studio Motion Training 1
----------------------	-------------------------------------

Duration	1 days
-----------------	--------
